Legislative Priorities of the Student Government
Virginia General Assembly Session 2015

1. We support legislation that provides an increase in state funding that would:
   - Provide an increase in student financial aid funding
   - Provide an increase in research funding
   - Provide a raise in compensation for faculty and staff members
   - Provides funding that would allow for the reconstruction of Robinson Hall
   - Provides funding to create and maintain a Cyber Security degree program

2. We support legislation that provides the university with the financial resources to create and implement a fair tuition rate for incoming classes that would lock their tuition throughout their attendance at Mason.

3. We support legislation that will extend voting rights to student members of university governing bodies such as Boards of Visitors, Boards of Trustees, etc.

4. We support legislation that provide financial and creative resources to combat the problem of sexual violence on college campuses

5. We support legislation that maintains and extends forms of identification used commonly by students for purposes of voting
